WORK EXPERIENCE

Java Developer
Conacent Consulting Pvt. Ltd

01/2023 - Present   *Kolkata India*
CF-90, CF Block, Sector 1, Bidhannagar, Kolkata, West Bengal 700064

Achievements/Tasks

- I have a comprehensive background in the Software Development Life Cycle, specializing in Java development with expertise in designing and implementing various applications. My skills include working with Oracle 11G and PostgreSQL databases, configuring SFTP servers using WinSCP, implementing PGP encryption, integrating WhatsApp messaging, and utilizing SMTP for email communication. Additionally, I have experience in automating tasks through Cron scheduling.

- Merged front-end tasks and assignments by designing a user-friendly Angular interface. Implemented dynamic features through Angular data binding and validation, enhancing user experience. Efficient data management was achieved using Angular services, reducing redundancy. Collaborated with back-end developers for seamless API integration, ensuring effective communication. Demonstrated proficiency in Angular CLI for streamlined project setup and optimized code.

EDUCATION

M.Tech
Budge Budge Institute Of Technolgy

GITHUB · ORACLE · Spring Security(JWT) · HTML&CSS5 · JPA Hibernate · JAVA11 · Spring Boot · MicroServices · Postgresql · Postman · WinSCP · SFTP Server · PuTTY · JavaScript/JQuery · AJAX · Angular 14 · AWS

PROJECTS

Monster Bill Project(P2P) (03/2023 - 10/2023)
- In the Monster Bill project, I'm crafting a tailored system with Java 11, Spring Boot, PostgreSQL, and AWS. My focus lies in refining RESTful APIs, molding business logic, Worked on Dashboard and automating the end-to-end P2P flow, optimizing processes from supplier creation to payment. #Java #SpringBoot #AWS #Automation #MicroService

CCPL Project Management System (05/2023 - 11/2023)
- Using Spring Boot and java11 and with database as Oracle and implemented excel file upload into database and view those data in front end and download excel of those data into machine And Creating RestAPIs. Also Deploy the Project on AWS Server.

IncomeTax (Government Project) (08/2023 - Present)
- Contributed significantly to the development of the Tax Management System, primarily focusing on creating robust RESTful APIs to ensure seamless data interactions. Additionally, innovatively integrated a WhatsApp feature into the system, enhancing communication channels for notifications and alerts. Using Spring Boot , Java 11, Oracle and Spring Security.

EcoNet Systems(36 Bank Integration) (10/2023 - Present)
- I played a pivotal role in integrating 36 banks into the Econet system, ensuring seamless connectivity in the financial ecosystem. I deployed code, addressed client issues proactively through meetings and emails. Proficient in Spring Boot, I implemented PGP encryption for secure server-to-server file transfers and SSH key-based retrieval from client servers.
- Enriching the project, I implemented Cron-based Scheduling and managed HTTPS requests with CRT and JKS files for secure communication.
